

Moss Valley Primary Academy

Supporting pupils at school with medical and mental health conditions

DfE Ref:

Ensuring a good education for children who cannot attend school because of health needs – Statutory guidance for local authorities (December 2023)

[Arranging education for children who cannot attend school because of health needs \(publishing.service.gov.uk\)](https://www.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/114122/Ensuring_a_good_education_for_children_who_cannot_attend_school_because_of_health_needs.pdf)

Supporting pupils at school with medical conditions – Statutory guidance for governing bodies of maintained schools and proprietors of academies in England (December 2015)

[Supporting pupils at school with medical conditions \(publishing.service.gov.uk\)](https://www.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/114122/Supporting_pupils_at_school_with_medical_conditions.pdf)

School's responsibilities when mental health issues are impacting on a pupil's attendance (February 2023)

[Summary of responsibilities where a mental health issue is affecting attendance \(publishing.service.gov.uk\)](https://www.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/114122/Summary_of_responsibilities_where_a_mental_health_issue_is_affecting_attendance.pdf)

Supporting pupils within the school community

Children and young people with temporary or recurring medical or mental health needs are valued as full and participating members of the school community. In September 2014 a new duty was introduced for governing bodies to make arrangements to support pupils at school with medical conditions, in terms of both physical and mental health, to enable them to play a full and active role in school life, remain healthy and achieve their academic potential. The school's co-ordinator for children with medical needs will have overall responsibility for ensuring that this, and other policies and procedures, are regularly reviewed and fully implemented

At this school the co-ordinators for pupils with medical needs are: Mrs Suzanne Lewis and Mrs Katy Thomason

Definitions of a medical condition:

Pupils' physical and/or mental health medical needs may be broadly summarised as being:

- Short-term - affecting their participation in school activities because they are on a course of medication or recovering from an illness. E.g. infections, broken limb, post-operative support.
- Long-term - potentially limiting their access to education and requiring extra care and support (deemed special medical needs). E.g. Asthma, cancer treatments, pending transplant, mental health/neuro developmental conditions.
- When mental health issues are impacting on a child's attendance.

Procedure to be followed when notification is received that a pupil has a medical condition:

Staff will meet with parents/carers and medical staff.

A medical plan will be written or discussed and adhered to in school.

If required, several members of staff will undergo any training needed.

Any adjustments or requirements that are required to support the child will be put into place.

For children starting Moss Valley Primary Academy, arrangements will be in place in time for the start of the relevant school term. In other cases, such as a new diagnosis or children moving to a new school mid-term, this should normally take no more than two weeks. [A flow chart setting out the process that may be followed for identifying and agreeing the support a child needs is provided at appendix A].

Individual healthcare plans:

Individual healthcare plans (IHCP) can help to ensure that schools effectively support pupils with medical conditions. They provide clarity about what needs to be done, when and by whom. They are likely to be helpful in the majority of cases, and especially for long-term and complex medical conditions, although not all children will require one. [A model IHCP is provided at Appendix B].

<p>At this school the individual(s) responsible for drawing up IHCPs will be: Mrs Suzanne Lewis and Mrs Katy Thomason in liaison with teaching and medical staff.</p>
--

Plans will be reviewed at least termly or earlier if the child's needs change. They will be developed in the context of assessing and managing risks to the child's education, health and social well-being and to minimise disruption. Where the child has a special educational need, the individual healthcare plan will be linked to the child's EHC plan where they have one.

When drawing up an IHCP the following will be considered:

- the medical condition, its triggers, signs, symptoms and treatments;
- the pupil's resulting needs, including medication (its side-effects and its storage) and other treatments, dose, time, facilities, equipment, testing, dietary requirements and environmental issues e.g. crowded corridors, travel time between lessons;
- specific support for the pupil's educational, social and emotional needs – for example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions;
- the level of support needed, (some children will be able to take responsibility for their own health needs), including in emergencies. If a child is self-managing their own medication, this should be clearly stated with appropriate arrangements for monitoring;
- who will provide this support, their training needs, expectations of their role, cover arrangements for when they are unavailable and confirmation of proficiency to provide support for the child's medical condition from a healthcare professional;
- who in the school needs to be aware of the child's condition and the support required
 - written permission from parents and the head teacher at your school for medication to be administered by a member of staff, or self-administered by individual pupils during school hours;
- separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the child can participate e.g. risk assessments;
- where confidentiality issues are raised by the parent/child, the designated individuals to be entrusted with information about the child's condition
 - what to do in an emergency, including whom to contact, and contingency arrangements. Other pupils in the school should know what to do, such as informing a teacher immediately if they think help is needed. If a child needs to be taken to hospital, staff should stay with the child until the parent arrives, or accompany a child taken to hospital by ambulance.

In the event of an emergency, the ambulance (or other emergency service) should be directed to: Moss Valley Primary Academy, Cutnook Lane, Irlam, M44 6GX – front entrance

Collaborative working arrangements:

Supporting a child with a medical condition during school hours is not the sole responsibility of one person. Partnership working between school staff, healthcare professionals, and

where appropriate, social care professionals, local authorities and parents and pupils is critical.

The Governing body/Management Board will:

- Ensure that arrangements are in place to support pupils with medical conditions. In doing so they should ensure that such children can access and enjoy the same opportunities at school as any other child. No child with a medical condition will be denied admission or prevented from taking up a place in school because arrangements for their medical condition have not been made
- Take into account that many of the medical conditions that require support at school will affect quality of life and may be life-threatening. They will often be long-term, on-going and complex and some will be more obvious than others. The governing body will therefore ensure that the focus is on the needs of each individual child and how their medical condition impacts on their school life
- Ensure that their arrangements give parents confidence in the school's ability to support their child's medical needs effectively. The arrangements will show an understanding of how medical conditions impact on a child's ability to learn, increase their confidence and promote self-care. in line with their safeguarding duties, not place other pupils at risk or accept a child in school where it would be detrimental to the child and others to do so
- Ensure that the arrangements they put in place are sufficient to meet their statutory responsibilities and should ensure that policies, plans, procedures and systems are properly and effectively implemented. Governing bodies should ensure that sufficient staff have received suitable training and are competent before they take on responsibility to support children with medical conditions. They should also ensure that any members of school staff who provide support to pupils with medical conditions are able to access information and other teaching support materials as needed.
- **Governing bodies should ensure that written records are kept of all medicines administered to children.**
- **Headteachers have overall responsibility for the development of individual healthcare plans.**

The Headteacher will:

- Ensure that policies are developed and effectively implemented with partners. This includes ensuring that all staff are aware of the policy for supporting pupils with medical conditions and understand their role in its implementation
- Ensure that all staff who need to know are aware of the child's condition
- Ensure that sufficient trained staff members are available to implement the policy and deliver against all individual healthcare plans, including in contingency and emergency situations. This may involve recruiting a member of staff for this purpose

- Contact the designated School Health Advisor in the case of any child who has a medical condition that may require support at school but who has not yet been brought to the attention of the school nurse;
- Make sure that the school is appropriately insured and that staff are aware that they are insured to support pupils in this way (see Liability and Indemnity below for further details).

School staff will:

- Any member of school staff may be asked to provide support to pupils with medical conditions, including the administering of medicines, although they cannot be required to do so.
- All staff will have received suitable training, and their competency will be assured, before they take on responsibility to support children with medical conditions.
- Any member of school staff should know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

Pupils will:

- Often be best placed to provide information about how their medical condition affects them. They will be fully involved in discussions about their medical support needs and contribute as much as possible to the development of, and comply with, their individual healthcare plan. Children who are competent will be encouraged to take responsibility for managing their own medicines and procedures. Wherever possible, children will be allowed to carry their own medicines and relevant devices or should be able to access their medicines for self-medication, quickly and easily. Children who can take their medicines themselves or manage procedures may require a level of supervision.

Parents/carers will:

- Provide the school with sufficient and up-to-date information about their child's medical needs. They may in some cases notify the school that their child has a medical condition. They will also be involved in the development and review of their child's individual healthcare plan. They should carry out any action they have agreed to as part of its implementation, e.g. provide medicines and equipment and ensure they or another nominated adult are contactable at all times.

School Health Advisor or other qualified healthcare professionals will:

- Notify the school when a child has been identified as having a medical condition who will require support in school. Wherever possible, they will do this before the child starts at the school.

The School Health Advisor would not usually have an extensive role in ensuring that schools are taking appropriate steps to support children with medical conditions, but can support staff on implementing a child's individual healthcare plan (if required) and provide advice and liaison.

- The School Health Advisor is able to provide support and training to school staff to administer the following medications:

- o Epipen (for allergies)
- o Buccal Midazolam (for epilepsy)
- o Inhalers (for asthma)

At this school, the allocated school nurse/qualified healthcare professional is Avril Stanton.

GPs, paediatricians and other healthcare professionals:

- May notify the school health advisor when a child has been identified as having a medical condition that will require support at school.
- They may provide advice on developing healthcare plans.
- School Health Advisors and Specialist Advisors may be able to provide support in schools for children with particular conditions (eg asthma, diabetes, epilepsy or other health needs as appropriate).

Local authorities will:

- Promote cooperation between relevant partners such as governing bodies of maintained schools, proprietors of academies, clinical commissioning groups and NHS England, with a view to improving the well-being of children so far as relating to their physical and mental health, and their education, training and recreation;
- Wherever possible, provide support, advice and guidance, including suitable training for school staff through the School Health Advisors, to ensure that the support specified within individual healthcare plans can be delivered effectively;
- Work with schools to support pupils with medical conditions to attend full time. Where pupils would not receive a suitable education in a mainstream school because of their health needs then the local authority has a duty to support schools in making other arrangements.

At this school, the allocated LA officer for Salford is Cathy Starbuck- Director for education and inclusion.

Providers of health services will:

- Co-operate with schools that are supporting children with a medical condition, including appropriate communication, liaison with school health advisors, and participation in locally developed outreach and training.

Clinical commissioning groups will:

- Ensure that commissioning is responsive to children's needs, and that health services are able to co-operate with schools supporting children with medical conditions.

Staff training and support

*[This section should outline how staff will be supported in carrying out their role to support pupils with medical conditions, and how this will be reviewed. This should specify how training needs are assessed and how and by whom, training will be provided – this should include raising whole staff awareness of relevant issues. **Staff should not give prescription medicines or undertake health care procedures without appropriate training (updated to reflect individual healthcare plans at all times) from a healthcare professional]***

Managing medicines on school premises

- Medicines will only be administered at school when it would be detrimental to a child's health or school attendance not to do so.
- No child under 16 should be given prescription or non-prescription medicines without their parent's written consent - except in exceptional circumstances where the medicine has been prescribed to the child without the knowledge of the parents (It is good practice for professionals to follow the criteria commonly known as the Fraser guidelines). In such cases, every effort should be made to encourage the child or young person to involve their parents while respecting their right to confidentiality.
- No child under 16 will be given medicine containing aspirin unless prescribed by a doctor. Medication, e.g. for pain relief, should never be administered without first checking maximum dosages and when the previous dose was taken. Parents should be informed.
- Where clinically possible, medicines should be prescribed in dose frequencies which enable them to be taken outside school hours.
- The school will only accept prescribed medicines that are in-date, labelled (with the child's name and instructions for administration, dosage and storage) and provided in the original

container as dispensed by a pharmacist. The exception to this is insulin which must still be in date, but will generally be available to schools inside an insulin pen or a pump, rather than in its original container.

- All medicines will be stored safely. Children will know where their medicines are at all times and be able to access them immediately. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenalin pens will be readily available to children and not locked away.
- A child who has been prescribed a controlled drug may legally have it in their possession if they are competent to do so, but passing it to another child for use is an offence.
- The school will keep a record of all medicines administered to individual children, stating what, how and how much was administered, when and by whom. Any side effects of the medication to be administered at school should be noted; and if medication is for any reason not given a record must be kept and the parent informed.
- A record of all allergies of the child must be maintained.
- When no longer required, medicines will be returned to the parent to arrange for safe disposal. Sharps boxes will always be used for the disposal of needles and other sharps.

Liability and indemnity:

Governing bodies of maintained schools and management committees of academies and PRUs should ensure that the appropriate level of insurance is in place and appropriately reflects the level of risk. In the event of a claim alleging negligence by a member of staff, civil actions are likely to be brought against the employer.

Maintained schools - Salford City Council's Risk Manager has been consulted on this policy and the insurers have provided a medical treatment decision tree and an explanation of cover available.

rmp-Combined Liability-Medical treatment table.pdf

rmp-Combined Liability-treatment decision-tree.pdf

Insurance School Treatment endorsement;

It is a condition precedent to the right of the Insured to be defended or indemnified under the Medical Malpractice Policy that the Insured shall ensure and record that throughout the Period of Insurance;

- a) Each child who receives a medical procedure or intervention in school has a specific individual care plan signed off by the child's parents, the school head teacher and the child's General Practitioner or supervising consultant.
- b) The care plan must include full details of the emergency procedures in the event of a medical emergency.
- c) The child's parents have provided written consent for a non-Medical or Healthcare practitioner to provide the medical procedure or intervention to their child.

d) The employee who is providing the medical procedure or intervention has received full training from a registered Medical or Healthcare professional and has been signed off as fully competent in the procedure they are providing.

e) The employee who is providing the medical procedure or intervention has provided written confirmation that they have read and understood the individual care plan. N.B. Each claim is treated on its own merits and it is up to insurers if they accept a claim although (up to a certain limit) Salford City Council are self-insured.

Proprietors of academies - should ensure that either the appropriate level of insurance is in place or that the academy is a member of the Department for Education's Risk Protection Arrangements (RPA), a scheme provided specifically for academies. It is important that the school policy sets out the details of the school's insurance arrangements which cover staff providing support to pupils with medical conditions. Insurance policies should be accessible to staff providing such support. Insurance policies should provide liability cover relating to the administration of medication, but individual cover may need to be arranged for any healthcare procedures. The level and ambit of cover required must be ascertained directly from the relevant insurers. Any requirements of the insurance, such as the need for staff to be trained, should be made clear and complied with.

Day trips, residential visits and sporting activities:

Reasonable adjustments will be made to encourage pupils with medical conditions to participate in school trips and visits, or in sporting activities. Teachers will be aware of how a child's medical condition will impact on their participation, but there should be enough flexibility for all children to participate according to their own abilities. The schools will make arrangements for the inclusion of pupils in such activities unless evidence from a clinician such as a GP or consultant states that this is not possible.

Home to school transport for pupils requiring special arrangements

[This section should set out the arrangements to be made in relation to pupils with medical conditions travelling to and from school. This should include what should be done in emergency situations.]

Governing bodies may want the school's policy to refer to home-to-school transport – this is the responsibility of local authorities and is operated by the Passenger Transport Unit team in line with the requirements of the Education Act 1996, section 508 (a, b & c)

- All students accessing Home to School SEND transport support have an assessment of need carried out before being placed on any transport service vehicle.
- Each vehicle carries a route card listing address and contact details of students carried, seat type or wheelchair requirement, and a brief set of "in transit" care notes that may have a bearing on the journey to and from home together with emergency instructions specific to individual students.
- It should be noted that the detail level within the care note varies with the students level of need and is aimed at the journey requirements only, all information is supplied by parents and carers at point of the students "needs assessment" prior to service starting so that there

is a clear understanding of how a student's needs may be accommodated during their journey.

- Parents/carers are advised that it their responsibility to update this care information where changes may occur for the student.
- Passenger Assistants and/or Drivers are not employed, trained or authorised to carry out intimate care or medical intervention of any kind during a journey to or from home or school. The default and only course of action for vehicle crews in case of medical concerns will be to contact the emergency services.
- Where students may require specialised medical assistance en route, it remains the duty of the parents/carers to inform the transport department of this and make their own arrangements at their own cost for the provision of such specialised assistance whilst the student travels on the allocated vehicle.
- All parents/carers of students accessing the transport support supplied by the local authority are issued with a copy of "student conditions of carriage" which outlines the procedures, guidelines and requirements under which the service is operated.
- Transport support and assistance should be viewed as a means of accessing provisions and services and not as part of the medical care package for any student.

Unacceptable practice

Although school staff should use their discretion and judge each case on its merits with reference to the child's individual healthcare plan, it is not generally acceptable practice to:

- Prevent children from easily accessing their inhalers and medication and administering their medication when and where necessary
- Assume that every child with the same condition requires the same treatment
- Ignore the views of the child or their parents
- Send children with medical conditions home frequently or prevent them from staying for normal school activities including lunch
- If the child becomes ill, send them to the school office or medical room unaccompanied
- Penalise children for their attendance record if their absences are related to their medical condition e.g. hospital appointments
- Prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively
 - Require parents, or otherwise make them feel obliged to attend school to administer medication or provide medical support to their child, including with toileting issues. No parent should have to give up working because the school is failing to support their child's medical needs
- Prevent or create unnecessary barriers to children participating in any aspect of school life, including school trips, e.g. requiring parents to accompany the child

Complaints

Should parents be dissatisfied with the support provided to their child they should discuss their concerns directly with the school. If for whatever reason this doesn't resolve the issue, they may make a formal complaint via the school's complaints procedure.

Supporting pupils through periods of absence from school

For some pupils, their health condition will require them to have an extended period of time out of school. The school will do all that it can to ensure that such children are supported through their period of absence from school and sensitively re-integrated once they are well enough to attend.

The school's co-ordinator for children with medical needs will take an active and continuing role in their educational, social and emotional progress. The school will at all times aim to work in partnership with parents to ensure the best possible outcomes and a return to school as soon as possible.

Some children with medical conditions may have a disability. Where this is the case the governing body will comply with their duties under the Equality Act 2010. Some may also have special educational needs (SEN) and a statement, or Education, Health and Care (EHC) plan which brings together health and social care needs, as well as their special educational provision.

The school will continue to maintain a contact with a pupil who is unwell and not attending and will contribute to their academic and reintegration plans in order that they may enjoy a continuous level of education and support from the school during their period of absence. This may include providing other agencies with relevant information about the child, helping to maintain contact with parents, assisting with and guiding the work of the child, supporting the process of achieving public examinations or taking part in National Curriculum tests and providing emotional support at the level of teacher and peer involvement.

The school will do all that it can to maintain links with appropriate agencies and the Local Authority. Reintegration back into school will be properly supported so that children with medical conditions fully engage with learning and do not fall behind when they are unable to attend.

Local Authority Support

The aim of the Local Authority will be to support the school in its work to reintegrate pupils into full time education at the earliest possible opportunity. In the greatest number of cases this means a return to mainstream education.

The Local Authority Policy outlines the responsibilities for schools, local authority and health service. This should be read in conjunction with the school's policy.

Where a child's health condition requires an extended period of absence or repeated absences for the same condition, the school is required to notify the Local Authority.

These pupils may be:

- (a) Children who have been deemed by a medical practitioner as being too ill to attend the school for more than 15 days or who have conditions which lead to recurrent absences from school which becomes significant in the longer term.
- (b) Pupils with mental health problems who are unable to attend school.

Referral and Tracking Process

The aim will be to increase education provision so as to provide as much education as a pupil's health condition allows. Where a pupil requires alternative provision, the overall aim, in all cases, is to reintegrate pupils back into mainstream education as soon as possible, through an individually tailored reintegration plan.

- Where a pupil is, or likely to be, absent for a period of 15 days due to a medical condition, schools are required to notify the local authority [here](#) .
- All referrals should be accompanied by an individual health care plan (IHCP) and **must** be supported by medical confirmation from one of the following health professionals via existing correspondence e.g. appointment letter;
 - Hospital Consultant
 - GP
 - Paediatrician
 - Consultant Child or Adolescent Psychiatrist
 - Senior Mental Health Practitioner or Clinical Psychologist
 - 0-19 service
- Schools should have made reasonable adjustments to allow the pupil to access a suitable full time education (or as much as the child's health condition can manage) in line with statutory guidance 'Supporting pupils at school with medical conditions'. This may include arrangements for school work being sent home for short periods of absence, a part-time time table or virtual/on-line learning.
- Once notified by schools that a child will be absent for 15 days or more, the local authority will work alongside schools, health and other professionals (where appropriate) to ensure that suitable education is available. This will be facilitated by the school identifying a member of staff who will act as lead professional to work with an Attendance Officer and other professionals to ensure that the education provision is in place and appropriate through the monitoring of Individual Health Care Plans (IHCP).
- Where the LA Attendance Officer, school staff or any other professional involved in the IHCP require further support by the local authority, the School Attendance Service will refer the case to the Access to Education panel.
- The panel will consider information provided by school, pupil, parents & medical staff and additional information will be provided on an individual basis as required.
- The panel will determine whether any alternative provision should be provided on a temporary basis. The intention in all cases will be to reintegrate the pupil back into mainstream provision on a full time basis as soon as possible.

- This alternative provision may consist of on-line learning, one to one tuition or small group teaching in a specialised setting, such as The Arbour Academy, or can be an engagement activity with a specialist provider. Consideration will be given to providing transport where placement is other than the pupil's main base.
- Schools retain responsibility for funding provision utilising pupil's age weighted pupil unit (AWPU), pupil premium and SEND funding.

Referral Process for Health and Social Care

This policy should be followed where health and social care professionals identify a pupil who has been absent from school, either authorised or unauthorised, due to physical or mental health issues for **15 school days or more**.

Supporting pupils through periods of absence from school due to mental health issues

For some pupils, their mental health condition will require them to have time out of school. The school will do all that it can to ensure that such children are supported through their period of absence from school and sensitively re-integrated once they are well enough to attend.

The school's co-ordinator for mental health will take an active and continuing role in their educational, social and emotional progress. The school will at all times aim to work in partnership with parents to ensure the best possible outcomes and a return to school as soon as possible. Where necessary, referrals to in-school and external professional support will be sought in consultation with parents and carers.

As per paragraph 219 of the Working together to improve school attendance guidance, school staff will advise parents/carers to notify them on the first day the child is unable to attend due to illness. School staff will record absences as authorised where it is not possible for a pupil to attend due to illness (both physical and mental health related). Many children will experience normal but difficult emotions that make them nervous about attending school, such as worries about friendships, schoolwork, exams or variable moods. School staff will work quickly to communicate and work together with parents/carers, to ensure that such circumstances do not act as a barrier to regular attendance.

Any associated anxiety about attending will be mitigated as much as possible by creating a plan to implement reasonable adjustments to alleviate specific barriers to attendance. These adjustments will be agreed by and regularly reviewed with all parties, including parents/carers.

The school will do all that it can to maintain links with appropriate agencies and the Local Authority. Reintegration back into school will be properly supported so that children with mental health issues fully engage with learning and do not fall behind when they are unable to attend.

Local Authority Support

The aim of the Local Authority will be to support the school in its work to reintegrate pupils into full time education at the earliest possible opportunity. In the greatest number of cases this means a return to mainstream education.

The Local Authority Policy outlines the responsibilities for schools, local authority and health service. This should be read in conjunction with the school's policy.

Where a child's mental health condition requires an extended period of absence or repeated absences for the same condition, the school is required to notify the Local Authority.

Referral and Tracking Process

The aim will be to increase education provision so as to provide as much education as a pupil's health condition allows. Where a pupil requires alternative provision, the overall aim, in all cases, is to reintegrate pupils back into mainstream education as soon as possible, through an individually tailored reintegration plan.

- Where a pupil is, or likely to be, absent for a period of 15 days due to a medical or mental health condition, schools are required to notify the local authority [here](#) .
- All referrals should be accompanied by an individual health care plan (IHCP) and **must** be supported by medical confirmation from one of the following health professionals via existing correspondence e.g. appointment letter;
 - Hospital Consultant
 - GP
 - Paediatrician
 - Consultant Child or Adolescent Psychiatrist
 - Senior Mental Health Practitioner or Clinical Psychologist
 - 0-19 service
- Schools should have made reasonable adjustments to allow the pupil to access a suitable full time education in line with statutory guidance 'Supporting pupils at school with medical conditions'.
This may include arrangements for school work being sent home for short periods of absence, a part-time time table or virtual/on-line learning.
- Once notified by schools that a child will be absent for 15 days or more, the local authority will work alongside schools, health and other professionals (where appropriate) to ensure that suitable education is available. This will be facilitated by the school identifying a member of staff who will act as lead professional to work with an Attendance Officer and other professionals to ensure that the education provision is in place.
- Where the LA Attendance Officer, school staff or any other professional involved in the IHCP require further support by the local authority, the School Attendance Service will refer the case to the Access to Education panel.
- The panel will consider information provided by school, pupil, parents & medical staff and additional information will be provided on an individual basis as required.

- The panel will determine whether any alternative provision should be provided on a temporary basis. The intention in all cases will be to reintegrate the pupil back into mainstream provision on a full time basis as soon as possible.
- This alternative provision may consist of on-line learning, one to one tuition or small group teaching in a specialised setting, such as The Arbour Academy, or can be an engagement activity with a specialist provider. Consideration will be given to providing transport where placement is other than the pupil's main base.
- Schools retain responsibility for funding provision utilising pupil's age weighted pupil unit (AWPU), pupil premium and SEND funding.

This policy will be reviewed regularly and will be accessible to parents/carers via:

Template F: contacting emergency services

Request an ambulance - dial 999, ask for an ambulance and be ready with the information below.

Speak clearly and slowly and be ready to repeat information if asked.

1. your telephone number [**School number: 0161 464 0695**]
2. your name
3. your location as follows [**Moss Valley Primary Academy, Cutnook Lane, Irlam, M44 6GX**]
4. state what the postcode is – [**M44 6GX**] please note that postcodes for satellite navigation systems may differ from the postal code
5. provide the exact location of the patient within the school setting
6. provide the name of the child and a brief description of their symptoms
7. inform Ambulance Control of the best entrance to use and state that the crew will be met and taken to the patient
8. put a completed copy of this form by the phone
9. Template G: model letter inviting parents to contribute to individual healthcare plan development
- 10.
11. Dear Parent
12. DEVELOPING AN INDIVIDUAL HEALTHCARE PLAN FOR YOUR CHILD
13. Thank you for informing us of your child's medical condition. I enclose a copy of the school's policy for supporting pupils at school with medical conditions for your information.
14. A central requirement of the policy is for an individual healthcare plan to be prepared, setting out what support the each pupil needs and how this will be provided. Individual healthcare plans are developed in partnership between the school, parents, pupils, and the relevant healthcare professional who can advise on your child's case. The aim is to ensure that we know how to support your child effectively and to provide clarity about what needs to be done, when and by whom. Although individual healthcare plans are likely to be helpful in the majority of cases, it is possible that not all children will require one. We will need to make judgements

about how your child's medical condition impacts on their ability to participate fully in school life, and the level of detail within plans will depend on the complexity of their condition and the degree of support needed.

15. A meeting to start the process of developing your child's individual health care plan has been scheduled for xx/xx/xx. I hope that this is convenient for you and would be grateful if you could confirm whether you are able to attend. The meeting will involve [the following people]. Please let us know if you would like us to invite another medical practitioner, healthcare professional or specialist and provide any other evidence you would like us to consider at the meeting as soon as possible.

16. If you are unable to attend, it would be helpful if you could complete the attached individual healthcare plan template and return it, together with any relevant evidence, for consideration at the meeting. I [or another member of staff involved in plan development or pupil support] would be happy for you contact me [them] by email or to speak by phone if this would be helpful.

17. Yours sincerely

Dear Parent

DEVELOPING AN INDIVIDUAL HEALTHCARE PLAN FOR YOUR CHILD

Thank you for informing us of your child's medical condition. I enclose a copy of the school's policy for supporting pupils at school with medical conditions for your information.

A central requirement of the policy is for an individual healthcare plan to be prepared, setting out what support the each pupil needs and how this will be provided. Individual healthcare plans are developed in partnership between the school, parents, pupils, and the relevant healthcare professional who can advise on your child's case. The aim is to ensure that we know how to support your child effectively and to provide clarity about what needs to be done, when and by whom. Although individual healthcare plans are likely to be helpful in the majority of cases, it is possible that not all children will require one. We will need to make judgements about how your child's medical condition impacts on their ability to participate fully in school life, and the level of detail within plans will depend on the complexity of their condition and the degree of support needed.

A meeting to start the process of developing your child's individual health care plan has been scheduled for xx/xx/xx. I hope that this is convenient for you and would be grateful if you could confirm whether you are able to attend. The meeting will involve [the following people]. Please let us know if you would like us to invite another medical practitioner, healthcare professional or specialist and provide any other evidence you would like us to consider at the meeting as soon as possible.

If you are unable to attend, it would be helpful if you could complete the attached individual healthcare plan template and return it, together with any relevant evidence, for consideration at the meeting. I [or another member of staff involved in plan development or pupil support] would be happy for you contact me [them] by email or to speak by phone if this would be helpful.

Yours sincerely
